European Union (EU) Regulation on Chemicals (REACH)

As of June 2007, the European **Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)** entered into force.

REACH affects all industries, including the Automotive and many tiers of the supply chain.

Volvo Logistics Corporation is well aware of our obligations under REACH and is taking appropriate actions to comply. We are mainly, according to REACH, producers of packaging

Volvo Logistics has since 2008, in the sourcing process, required from our packaging suppliers to be compliant with the REACH regulations. According to REACH the suppliers have to deliver the proper chemical information to the downstream users on the market.

Volvo Logistics have also, as a producer, an obligation to communicate presence of candidate listed substances in our products downstream to next user.

VLC will inform you, in the context of our business relation, about any product changes due to REACH, the ability to deliver as well as the quality of the products supplied by us to you and will coordinate suitable measures with you.

Best regards

Susanna Hambeson
Environmental Manager
