Bulletin 01 : Landrover Range Rover (L322) 10MY Vehicle Starting Sequence

Summary:

To ensure that the battery is protected in transit the Landrover Range Rover (L322) 10MY has a transit relay that cuts power to the vehicle 15 seconds after the Engine has been switched off. To re-enable power to the vehicle and start the vehicle the operator/driver must press the hazard warning switch. This will give the operator/driver 15 seconds to get the engine running, or the driver will have to commence the starting sequence from the start. Starting Sequence is as shown below.

L322 10MY STARTING SEQUENCE

1 Depress Hazard Warning Switch

2 Depress and hold down brake pedal

3 Press start/stop button

Engine should start If engine does not start wait 15 seconds and repeat sequence1-3
