Volvo Auto Fold

Occasionally on starting up the engine, it may occur that side mirrors will fold out automatically. This option has been introduced lately on some of the Volvo models (MY09) and will be activated once the remote control has been used to lock the car.

In this occasion following applies!

On pushing both the side mirror control buttons simultaneously, which are located into the driver's side door consol, both mirrors will fold in automatically.

NOTE: Whenever it is required for safety reasons to fold out the mirrors automatically the same action applies. Make sure on folding out it occurs into an open space and the minimum required distances are met.
